[6] Education and Research (ED)

[6.20] Planning, implementation, monitoring and/or evaluation of university governance through the utilization of Information and Communication Technology (ICT)

Stage	Activities/Programs	ICT Utilization	Evidence	Timeline	Responsible Team/Department
Planning	The main areas of sustainability are determined for the research focus.	Regulations on research management have been prepared and are being published interactively.	Research-oriented documents are collected through software.	Completed	Research Office, Department of Information Technology and Rectorate
Implementation	Fund and support research projects on sustainability	Bap coordinatorship	Funding records, project reports	June 2023 - May 2024	BAP, Research Office
Monitoring	Research progress and publication output are monitored.	Research monitoring tools are made available through an online system.	Publication databases, progress reports	Ongoing	Research Office, BAP, Rectorate
Evaluation	The impact and quality of publications are evaluated.	Citation analysis tools are provided through peer review systems web of science and Google Scholar.	Impact assessment reports and citation measurements are made.	Annually	Research Office, Rectorate

GTU Online Systems

Description:

- **Planning:** Each year, the main areas of sustainability research are determined and communicated to researchers via email. National and international funds are provided for these research projects. It organizes and plans research activities. In order to manage funding proposals and ensure compliance with sustainability goals, research management is done online via the academic incentive system software.
- **Implementation:** Funding and support are provided for sustainability research projects and researchers are informed via email by the Research Coordination Office in order to facilitate access to necessary resources and information. Digital grant management systems are used to facilitate the funding process and track research projects.
- **Monitoring:** The progress of sustainability research and the number of academic publications produced are tracked online through the academic incentive system. Research tracking tools such as web of science and google scholar are used to track publication output and research milestones.
- **Evaluation:** The impact and quality of publications on sustainability are evaluated. Citation analysis tools and peer review systems are used to evaluate the reach and impact of research. This evaluation system is carried out online at the end of the year through the academic incentive system according to the academic incentive regulation. In this way, researchers benefit financially from the academic incentive throughout the year.
