9	10
Emergency exit sound system	Smoke detectors

11	12
Security WhatsApp contact line	Security surveillance system
Security and safety facilities on GTU campus (Gebze Technical University, Türkiye)	

Description:

Security and safety facilities on the GTU campus are shown in the pictures above.

1) There are fire hydrants every 150 meters on campus to ensure early intervention in the event of a fire.
2) The emergency plan provides a visual representation of the university's infrastructure, including the location of fire cabinets in buildings, the location of fire hydrants, security checkpoints on campus, automatic sprinkler systems, etc.
3) There are two other entrances to the campus, which are monitored by four CCTV cameras in addition to the protocol entrance.
4) In the example image, the cameras at the protocol entrance are circled in red. These cameras are located at other entrances, at the entrance to all buildings on campus, and in common areas within the building. These cameras are actively recording 7–24.
5) There is a security button in the elevator inside the buildings on campus for any danger.
6) All buildings on campus are equipped with panic buttons. These can be used to quickly report a possible emergency and inform others of the emergency.
7) There is an emergency exit sound system in all buildings on campus to spread the emergency situation quickly. There are also emergency exit doors in large buildings with a high number of staff and students.
8) All buildings on campus have emergency exit signs indicating where to go in case of an emergency.
9) A sample visual of the emergency exit sound system in the buildings on campus.
10) Smoke detectors are installed in all buildings on campus. This makes it easier to intervene in the event of a fire, etc., before the fire spreads and to evacuate people more quickly.

11) The purpose of this visual is to explain that there is a WhatsApp communication line through which campus security can be reached instantly. Thanks to this communication line, the security unit and staff on campus can be quickly reached 24 hours a day, 7 days a week. In this way, security units can intervene in a possible incident on campus in much less than 10 minutes.

12) The campus security unit is monitored 7 days a week, a week, 24 hours a day, by security personnel to ensure the safety of the campus. This creates a safe environment on campus and makes it easier to intervene immediately in the event of a possible incident. It also makes it possible to record any incident that may occur.
