1

Health center building

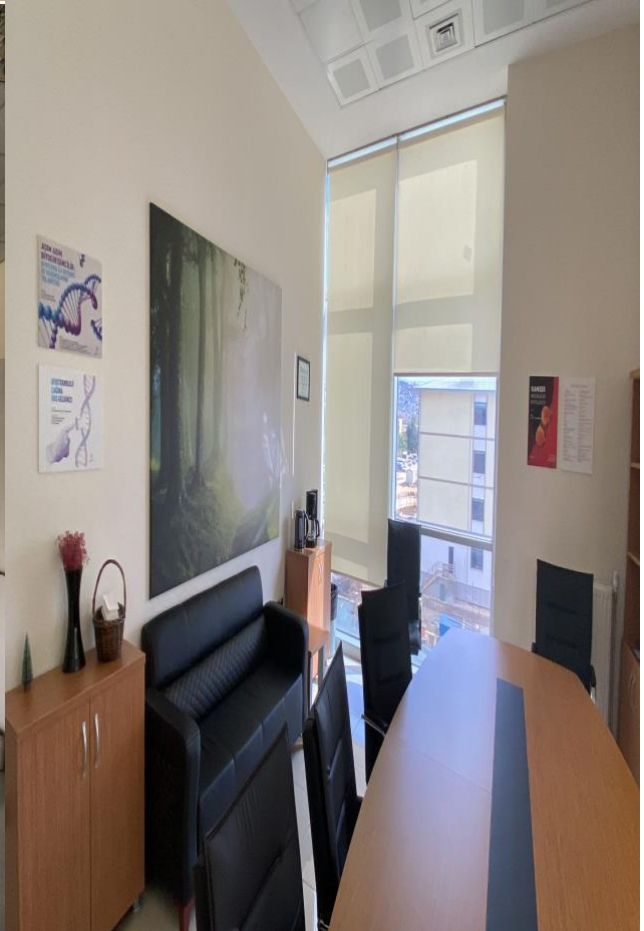

2

Health center building- overall interior appearance

3

Breastfeeding and mother care rooms

4

Medical treatment room

5

Immunization and pediatric check-up room

6

Dentist

7

Psychological counseling and guidance services

8

Consultation room

9

First aid kit

Health infrastructure facilities for students, academics, and administrative staff's wellbeing on GTU (Gebze Technical University, Turkey)

Description:

The GTU Health Centre provides free health services to students, staff, and their families and is staffed by two general practitioners: a dentist, a psychotherapist, and a nurse. Individuals wishing to access the full range of health services can do so by making an appointment through the GTU online appointment system. The extended link to the GTU online appointment system is shown below. There are also first-aid kits for minor injuries and accidents in almost every building.

- 1) Figure 1 shows the external view of the health center that serves the GTU campus.
- 2) Figure 2 is an interior view of the health center. This area is designed as a waiting area for people who will benefit from health services.
- 3) The health center, faculties, and departments on campus have breastfeeding rooms and mother-care rooms for staff, staff relatives, and students. In these areas, mothers can easily meet the basic needs of their babies. The images related to this are in area number 3.
- 4) The medical treatment room is designed to be an area where first aid is given in the event of an injury, etc.
- 5) The health center keeps a vaccination schedule for students and staff babies aged 0-4. These vaccinations are administered free of charge according to the schedule.
- 6) This picture shows the dental clinic, which is free of charge for GTU students, staff, and their families. The clinic provides free services such as fillings, root canals, and dental cleanings.
- 7) As an institution, GTU cares about the mental health of its students and staff. There is a psychotherapist who provides services to protect the mental health of these people. Similarly, those who wish to benefit from this service can make an appointment free of charge through the online appointment system.
- 8) This image shows the area where people who want to benefit from health services are examined.
- 9) This is a sample of the bag containing the necessary materials to provide first aid for minor accidents and injuries in almost any area of the campus.
